

# PDA COCKPIT UNDERFLOOR DUCTING

## IMPROVED MANUFACTURING

Using state of the art manufacturing techniques, Rocky Mountain Aircraft has engineered a high quality air duct created from high performance polymers.

## DESIGNED WITH DURABILITY IN MIND

This will ensure durability and ease of installation. Mounting provisions are incorporated into the design. As a result, versatility and strength are achieved.

PDA BLEED AIR DUCTS

## **TCCA APPROVALS**

Our Transport Canada engineering delegates have developed a multitude of TCCA approvals for modification, installations and repairs for a wide variety of FAR-23, FAR-25 aircraft and FAR-27, FAR-29 rotocraft

## **ALL INCLUSIVE PARTS**

Our Parts department stocks an extensive array of new, overhauled, and serviceable parts to support all series of DeHavilland Twinn Otter aircraft

## **EXPERIENCED MAINTENANCE TECHNICIANS**

Our engineers and technicians are masters of their craft. Hands-on experience has been enhanced with manufactures' type courses for both aircraft and engines. We employ some of the most experienced sheet metal technicians in the industry. Our Twin Otter Experience is second to none.

## **COMPREHENSIVE AVIONICS SERVICES**

Our Avionics team is pleased to support clients, locally and world-wide, with custom services - from ELT recertification to complete aircraft rewire and major avionics upgrades.

## **ENGINE SUPPORT SERVICES**

From engine sales and leasing to on-wing maintenance and on-site support, We have the personnel, experience and equipment to help you with your PT6 project. Our services include short and long term engine leasing customized to individual operators requirements.
